Business Operation Policies for Fiscal 2017

<Initiatives concerning the case of fraud in confirmation of requirements for crisis response measures>

■ Under the Reform Headquarters, established on April 25, 2017 under the direct control of the President and Representative Director, we continue investigations of all crisis-response loans that have yet to be investigated, after ensuring proper objectivity, and disclose the whole picture by identifying problems and their root causes based on the results of the said investigations and those of the third-party committee. Then we will quickly work on efforts for taking necessary measures with all our might, including formulation of drastic recurrence prevention measures in order to establish/improve the compliance structure, the business management structure and the internal control structure, as well as clarification of responsibility among the executives and employees.

<Efforts to support enhancement of corporate value of SMEs and SME cooperatives and contribute to revitalization of local communities>

■ Although capital investment is up and down, the economy is showing trends toward improvement, reflecting recovery of overseas economies and improvement in the employment environment. SME's business confidence generally remains unchanged, but concern is mounting over future cost increases mainly due to rises in crude oil prices and the impact of labor shortage. Amid this environment, in order to provide solid support to SMEs who are engaged in the reconstruction and revitalization efforts after disaster or working on the

revival of local economies, as well as those who are having difficulty with business performance and cash flows, the Shoko Chukin Bank continues to put in its utmost effort to fulfill the safety net function.

- With regard to supporting growth, in cooperation with regional financial institutions we will provide risk money to SMEs engaged in strategic overseas development, key local companies that have a great influence on the economy of the local community and SMEs and SME cooperatives working together with other business operators to use local resources.
- In anticipation of the growing needs for capital investment aimed at improvement of productivity, business restructuring, including consolidation, responses to labor shortages, etc. in wide-ranging business categories and business types, the Bank intends to strengthen initiatives such as supply of growth funds in a timely and appropriate manner, support for overseas expansion, support for M&As and business succession, and business matching.
- With regard to support for revitalization, we will further strengthen our collaboration with various support institutions, and work on efforts such as performing our consulting capabilities through initiatives such as support for formulating management improvement plans and follow-up activities, support for drastic revitalization, and support for normalization of financial transactions.

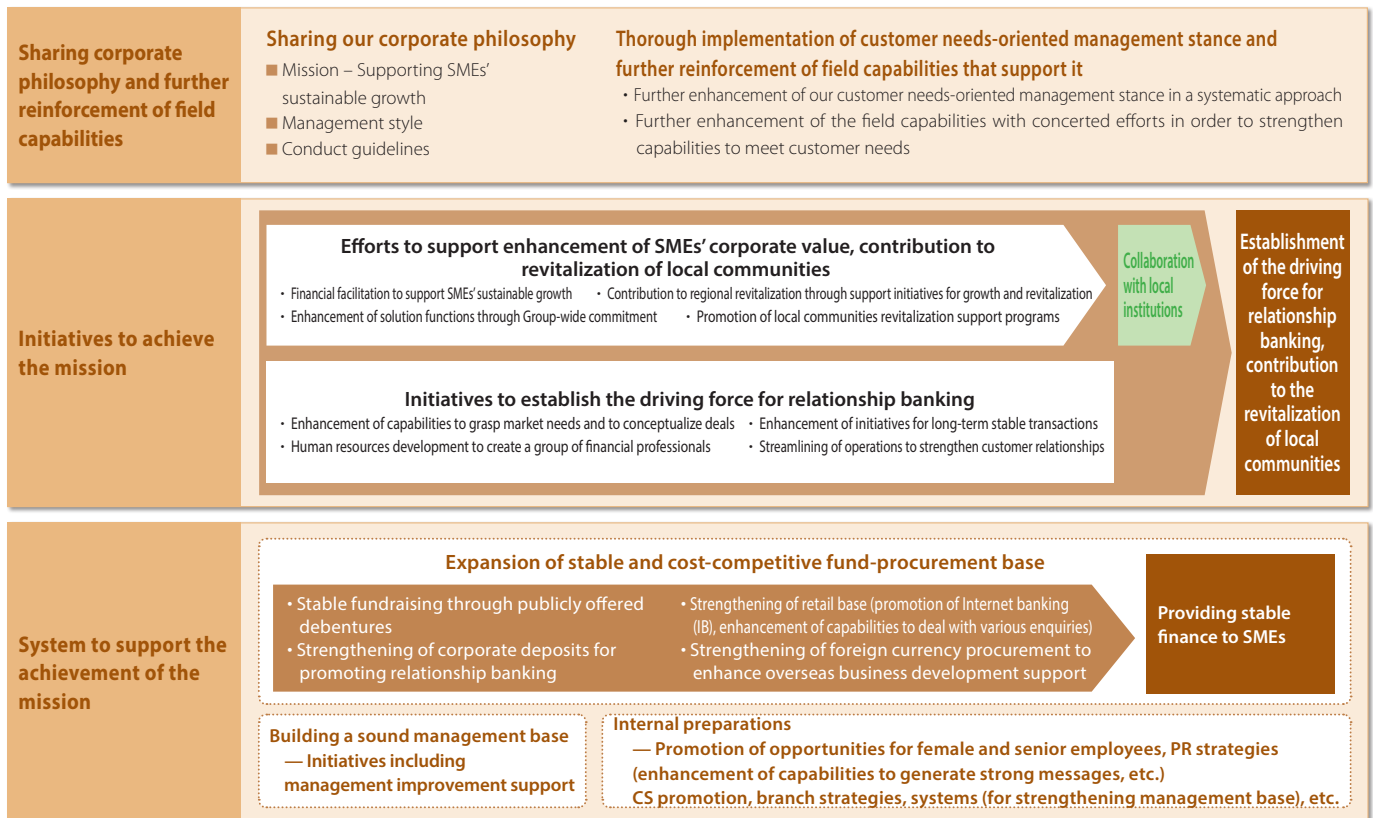

Third Medium-Term Business Plan (From April 2015 to March 2018)

Looking at the future a decade from now, it is expected that the era of fully-fledged population decline will have arrived and globalization will have progressed even further. We anticipate that management needs of SMEs will become more sophisticated in order to deal with these changes. It is precisely the mission of the Shoko Chukin Bank to support SMEs and the local economy by leveraging its network and solution functions, in addition to its role in fulfilling the safety net function, addressing these management needs of SMEs, and we believe that the government and SMEs have high expectations of us.

We decided to develop the Third Medium-Term Business Plan based on our full appreciation of our mission to address the new challenges emerging from our changing operational environment.

Basic Philosophy of the Third Medium-Term Business Plan

- We will follow the primary principle that aims to fulfill our mission “to support the sustainable growth of SMEs and SME cooperatives” in order to achieve further growth as a financial institution trusted and chosen by SMEs and the local community. Meanwhile, we will further enhance our customer needs-oriented management stance. In addition, we will build a strong management base of our own and establish the identity of Shoko Chukin Bank.

Fulfilling a Safety Net Function, Mainly in Crisis Response Measures

In response to the financial crisis triggered by the sub-prime loan problem in the United States in the autumn of 2008, and the Great East Japan Earthquake of March 2011, crises were declared by the government, and the Shoko Chukin Bank, as the only legally designated financial institution for SMEs, has been devoting its full efforts to fulfilling a safety net function, mainly in crisis response measures.

As of the end of March 2017, a total of 221,605 projects have been implemented under the crisis response measures, at a value of over ¥12,430.6 billion, through which we have been able to make significant contributions to facilitating finance for SMEs, and furthermore, maintaining employment and stabilizing the economy in local communities.

A Stable Transaction Stance

The Shoko Chukin Bank, through its day-to-day transactions with SMEs, not only looks at financial matters, but also takes the clients' operations, technology, and the abilities and enthusiasm of the executives into consideration. In this way, we strive to provide services that respond flexibly to corporate needs, not focusing on temporary management setbacks, but maintaining a stable transaction stance over the long-term.

As apart from financial support, the support for information provision also plays an important role in the overseas expansion of the SMEs. From 1996, we have combined “Information Provision” and “Financial Services” and established “Support for Overseas Expansion (Overseas 21).”

With regard to the information provision, our staff from the headquarter will visit our clients and give advice on overseas expansion, as well as offering informational support such as providing information about the investment environment. The Shoko Chukin Bank established the “Global Niche Top Supply Loan System” in April 2014 to grant loans for essential funding incurred in overseas expansion for the SMEs which aim to strengthen their industrial competitiveness, expand their existence in specific sectors, and become the global niche top (GNT) company. Our system has supported the strategic overseas expansion of the targeted SMEs, providing ¥37.7 billion for 342 cases as of the end of March 2017.

Support for Agriculture-Commerce-Industry

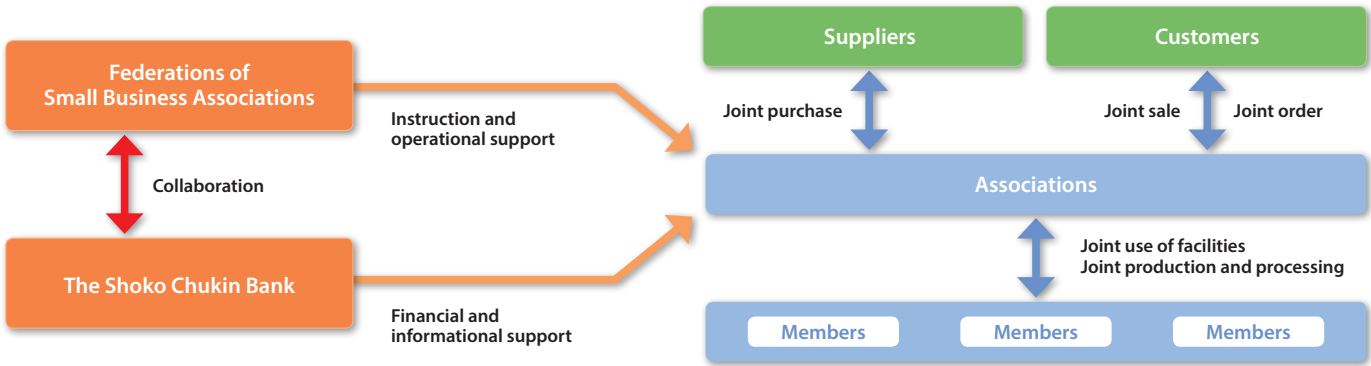

With the aim of attaining synergistic effect, the government has developed the policy of “Support for Agriculture-commerce-industry” to strengthen the collaboration between the commerce industry and the agriculture, forestry and fishery industry.

According to the Agriculture-Commerce-Industry Cooperation Promotion Act, it is advantageous for the SMEs to be certified by the Act as certified parties are eligible to enjoy various support measures. The Association of SMEs helps individual enterprises overcome difficulties and plays an important and leading role in assisting the value-adding of the SMEs by increasing the members’ productivity through the association of joint enterprises and, as a collaborative institution, supporting new projects of the members, etc. The Shoko Chukin Bank collaborates with the Federations of Small Business Associations (an instruction institution of the Association of SMEs) and provides financial support such as the “Loan Recommendation System of the Federation” as well as informational support such as the information about the subsidiaries policy.

Support for Collaboration among Enterprises (Business Matching, Business Succession and M&As)

The Shoko Chukin Bank has been actively working on business matching, support for business succession and M&As through its national networks and relations with business partners.

Business matching will add value to the enterprises through increase in sales, reduction in purchasing cost, etc. We will endeavor to enhance the service while maintaining the relationship with the Youth kai (Note 1) and Chukin kai (Note 2).

Demand to address the business succession and M&As has been increasing as many enterprises need to address the succession issues early on, in the face of an aging management team and the absence of successors. Solutions to these issues have been attracting increasing attention. In response to the needs of the business partners, we provide various information and support for financing the business succession and also take an active approach to offer comprehensive support, including M&As, to solve these issues in collaboration with certified tax accountants or other external specialists.

Taking one step further to actively formulate business improvement plans and hence lead them to success, the Shoko Chukin Bank established the "Revitalization Support Program" in November 2012 which offers a package of general support services.

Also, in October 2013, the program further expanded and a refinance system that enhances the facilitation of essential fundraising was established for those SMEs which have shown improvement in performance as a result of the implementation of the improvement plan.

In addition, through the collaboration with institutions that support business revitalization such as the SME Revitalization Support Councils, together with the cooperation with regional financial institutions, the Shoko Chukin Bank is devoting to the value-adding of the enterprises and regional regeneration and revitalization for the SMEs.

Flowchart of the Revitalization Support Program

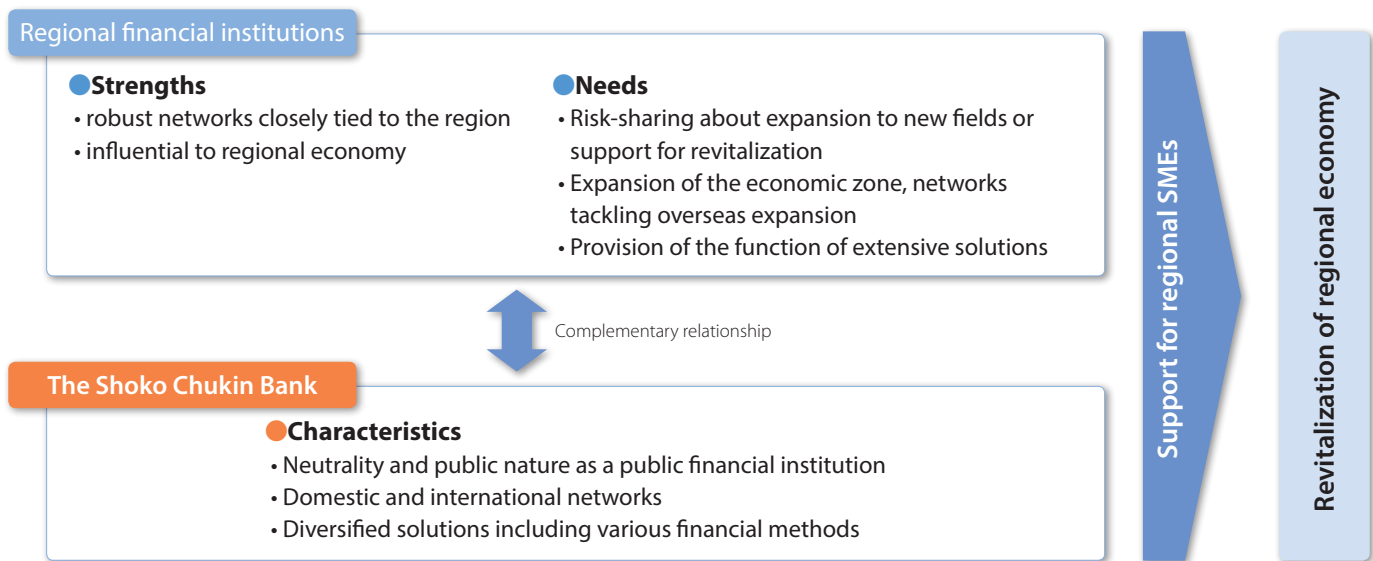

Collaboration and Cooperation with Regional Financial Institutions

The Shoko Chukin Bank regards the collaboration and cooperation with regional financial institutions as one of the fundamental parts of business operation. We treat regional financial institutions as “partners who help to achieve the revitalization of regional economy as well as the facilitation of regional finance, on the basis of coexistence and complementarity within the region”.

The collaboration and cooperation with the regional financial institutions has been further strengthened through the establishment of the Regional Collaboration Office on April 1, 2014, and, as a result, the headquarter and the branches could come together to deal with the collaboration business.

Concerning the specific effort on collaboration, the Shoko Chukin Bank maintained its neutrality and public nature, and makes use of the national networks as well as diversified solutions, in order to support regional SMEs through cooperative loans with regional financial institutions. Moreover, through the collaboration business, the Shoko Chukin Bank is also paying effort on the provision of complementary solutions in the extensive fields such as M&A, ABL and international affairs.
